HORMAR.B	Coppia pennarelli HORECA in blister / 2 pcs HORECA marker in blister

Caratteristiche tecniche contenitori in polipropilene IML HACCP

Polypropylene IML HACCP containers technical specifications

- Realizzati con materiali approvati FDA seguendo i requisiti generali stabiliti dal regolamento europeo CE1935/2004 in ottemperanza al regolamento UE 10/2011 e al decreto ministeriale 21/03/73
- Realizzati con etichetta permanente grazie alla tecnologia IML che consente di avere un'etichetta costampata
- L'etichetta dei nostri contenitori è la migliore soluzione ai problemi creati dalle tradizionali etichette adesive che tendono a lasciare residui appiccicosi richiedendo poi operazioni di raschiatura
- I contenitori in polipropilene con IML aiutano a garantire la sicurezza e l'igiene degli alimenti secondo la normativa HACCP
- Sono disponibili sia con coperchi colorati che con coperchi trasparenti con sede per COLOR CLIPS per evitare la contaminazione tra i vari alimenti
- I coperchi colorati e le clips sono disponibili nei colori giallo, blu, rosso, verde e viola. Su richiesta qualsiasi altro colore
- Per scrivere sull'etichetta viene fornito un pennarello specifico che viene rimosso con il semplice lavaggio in lavastoviglie
- Ottima resistenza agli urti a temperatura ambiente
- Buona trasparenza che permette di identificare facilmente il contenuto al proprio interno.
- Sopportano temperature da -40°C a +80°C
- Dotati di scala graduata sia secondo sistema metrico che americano
- Gradino di sovrapposibilità che consente agevole impilaggio
- Testati per uso in microonde Standard/Method: MHTH0037 Rev.0 2018 BS EN 15284:2007
- Testati per resistenza lavaggio lavastoviglie Standard/Method: UNI EN 12875-1:2005, UNI EN 12875-2:2002, MHTH036 rev.0 2018

AVVERTENZE - I contenitori in polipropilene non sono indicati per l'uso su tavole a vapore.

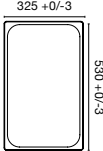

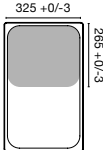

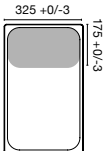

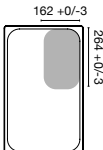

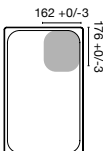

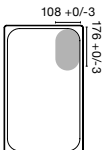

- Made with FDA-approved materials following the general requirements of the Regulation (CE) CE1935/2004 in compliance with the regulation UE 10/2011 and with the DM 21.03.73
- Made with a permanent label thanks to the IML technology that allows a molded label
- The labeling of containers is the best solution for problems arising from the traditional adhesive label that leaves sticky residuals which need constant scraping
- Containers made of polypropylene with IML help to ensure food safety and hygiene in compliance with HACCP standards
- To avoid food contamination, both colored lids and transparent ones with seat for COLOR CLIPS are available
- The colored lids and the clips are available in yellow, blue, red, green and violet. Any other color is available on request
- A specific marker for writing on the label is supplied which can be removed by simply washing in the dishwasher
- Excellent shock resistance at room temperature
- Good transparency allowing easily identification of the contents
- Can withstand temperatures from -40°C to +80°C
- Equipped with a graded scale according to both the metric and American systems.
- Edges for easy stacking
- Tested for microwave use Standard/Method: MHTH0037 Rev.0 2018 BS EN 15284:2007
- Tested for dishwasher resistance Standard/Method: UNI EN 12875-1:2005, UNI EN 12875-2:2002, MHTH036 rev.0 2018

WARNING - The containers made of polypropylene are not recommended to be used on steam tables.
